

**DIDACTIC OFFERING OF THE UNIVERSITY OF BOLOGNA  
ERASMUS MUNDUS EXTERNAL COOPERATION WINDOW LOT 17 CHILE**

**SECOND CALL**

**Application for Master courses**

In the framework of this second call the University of Bologna is willing to host students for short exchange periods: from 6 to 10 months, 1 or 2 semesters. According to the timetable of the Project we are able to accept students on exchange starting from our second semester (by February/March 2009).

It will be necessary to make previous arrangements about the acknowledgement of exams and credits obtained at the University of Bologna.

We are willing to accept students whose aim can be either taking exams (which can be then recognized by their Home University) or preparing their final thesis. As for the students interested in preparing their thesis, we will be able to host them starting from November 2008. The period of stay has to be arranged with the Professor appointed as the tutor. Before applying students should try to contact Professors whose research area might correspond to that of their thesis, however this is not a strict requirement. It should be very useful if students could attach to their application a research project for their thesis in order to be able to identify the right Tutor.

During their exchange period, the University of Bologna will make available to the students all its resources in terms of libraries, online catalogues, computers' laboratories, research centres and all other useful facilities.

*Language requirements:* for the courses taught in Italian a lower intermediate level of Italian language is mandatory; for the courses taught in English an upper intermediate level of English language is strictly required.

We will accept as a linguistic proof not only official language certificates but also Reference Letters signed and stamped by a Professor of Italian/English Language at the Home University.

Moreover every year on January, the University of Bologna offers to its foreign students intensive Italian language courses.

Anyway, the language competence is not the only selection criterion, each candidate will also be assessed according to his/her CV, personal experiences and strong motivations.
